Lab 08 Discussion - Group Policy

Question

What are the ways an administrator can control the scope of a GPO?

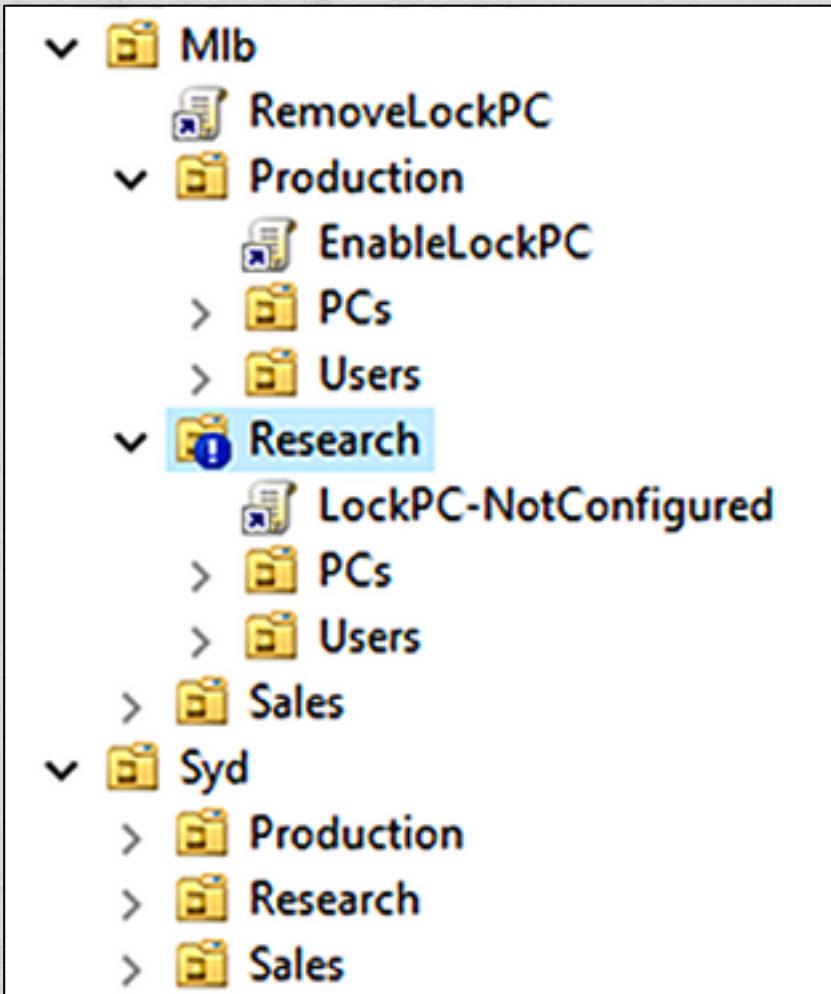

Question 1

- A user whose account is in Research>Users logs on.
- What will happen when they press CTRL+ALT+DEL?
- Will the Lock PC option display?

no, it will not block the PC in the Mlb, because group policy from Mlb will apply for all the children in.

Question 2

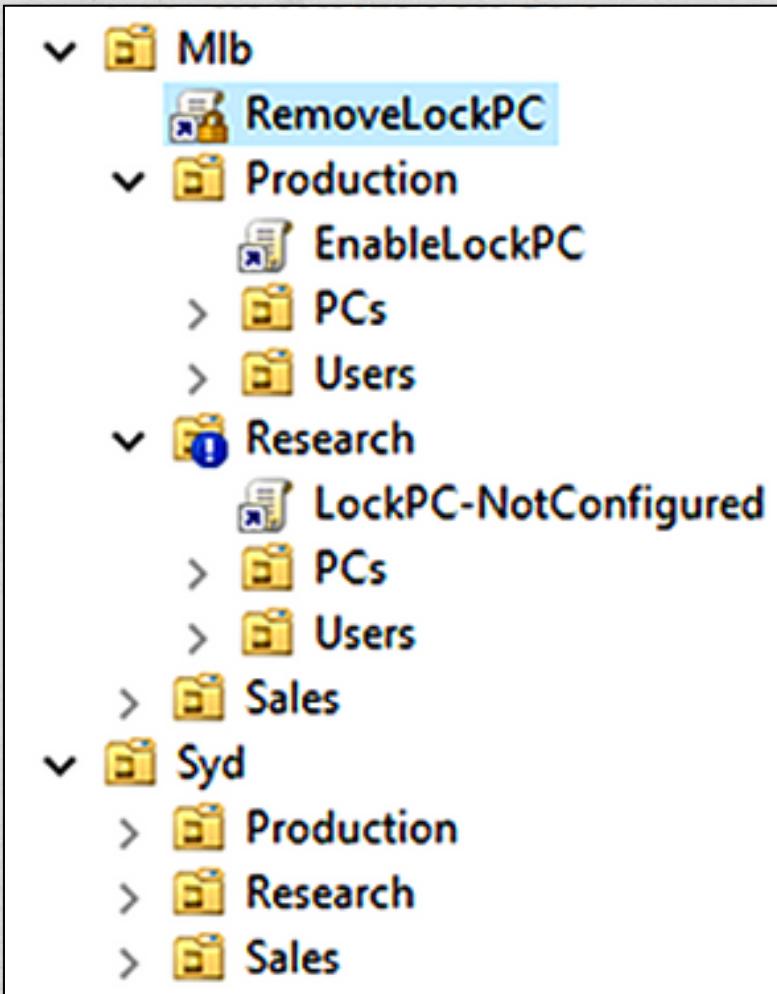

Notice the change at the Research OU:

- A user whose account is in Research>Users logs on.
- What will happen when they press CTRL+ALT+DEL?
- Will the Lock PC option display?

yes, you can see the option lock the PC

Question 3

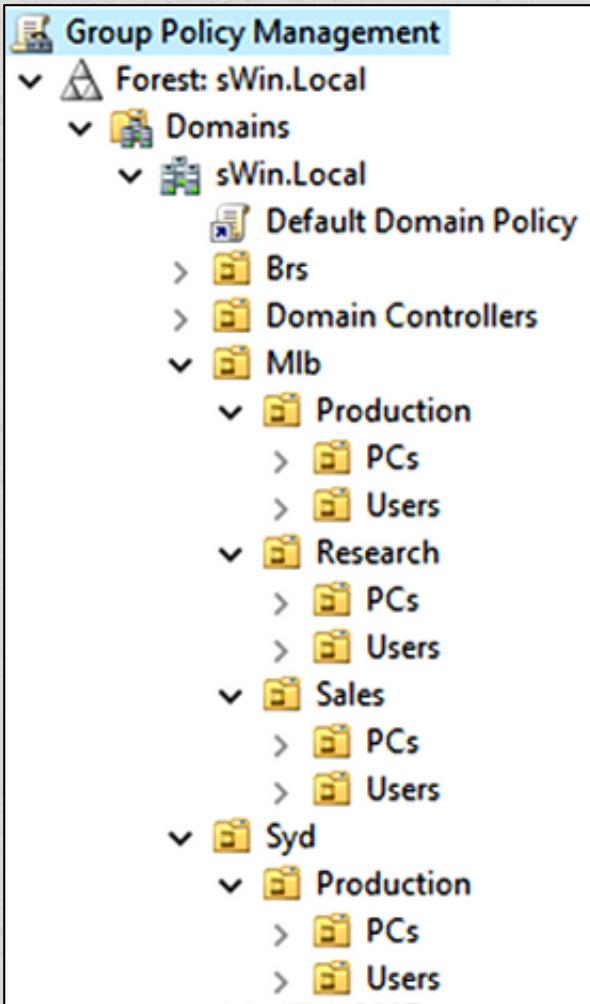

Notice the change at the
Mlb OU:

- A user whose account is in Research>Users logs on.
- What will happen when they press CTRL+ALT+DEL?
- Will the Lock PC option display?

no, the RemoveLockPC will override everything

Question 4

- A. All Users in the domain except Production Users should not be able to access the Task Manager when they press CTRL+ALT+DEL.
- B. If there were OUs in Brisbane, Adelaide, Perth, Darwin, and Hobart - with the same OU structure as Melbourne, what options do you have to streamline Production not losing the Task Manager?

remove the task manager --> assign the policy to be applied for the production people and then put deny
